ANTIOXIDANTS AND ORTHOMOLECULAR NUTRITION

FREE RADICALS AND ANTIOXIDANTS. Animal organisms use nutrients to produce energy. During this process, known as oxidation, oxygen is burned, generating free radical species. These are atoms or molecules which are highly unstable and highly reactive. Consequently, free radicals interact with other molecules, oxidizing them and making them very reactive, initiating a destabilizing chain that is repeated indefinitely. Free radicals may also be generated upon environmental insults we receive: ultraviolet radiation, X rays, ozone, medicine, highly processed foods, hydrogenated fat intake, pesticides, heavy metals, parasites, trauma, etc.

Free radicals attack tissue protein bonds, unsaturated fatty acids in cell membranes, DNA of the cell nucleus and many other organic structures of great physiological importance. It has been widely proved that free radicals have an influence on the origin and development of almost all degenerative diseases that affect animals: cancer, cardiovascular diseases, immune disorders, arthritis, cataracts, etc. When the organism is ill or older, the requirement of antioxidants intake increases. The use of antioxidants in doses higher than those normally occurring in foods greatly reduces the incidence of degenerative diseases and diminishes side effects of aggressive therapies such as corticosteroids, antibiotics, nonsteroidal anti-inflammatory drugs, chemotherapy, radiotherapy. Recommended administration: as a nutritional support during illness, and throughout the recovery process, in combination with conventional therapy, during and after consuming drugs, and after systemic antiparasitic treatments, etc.

ALLERGIES

FORMULATION
NEW
PRESENTATION

NEUTRALIZE ALLERGIC REACTIONS

Histamin Control

Formulated with natural substances that reduce the intensity of the allergic reactions. It can be used as a natural alternative to corticosteroids or other antihistaminic drugs, or as an option during suppression periods.

Indications: food allergies, atopic dermatitis, asthma, allergic rhinitis, eczema and hives. Indicated during vaccination periods.

▶ **Comprehensive protocol for allergies:** <http://bit.ly/2uqAQ1h>

Composition per tablet: Methylsulfonylmethane: 150 mg, Quercetin: 125 mg, Sodium ascorbate (Vitamin C): 125 mg, Beta-Glucans: 75 mg, Nettle extract (*Urtica dioica*): 75 mg, Bromelain: 50 mg, Magnesium gluconate: 50 mg (Mg: 2.7 mg), Glycine: 50 mg, Zinc chelate of methionine: 50 mg (Zn: 10 mg), Lipoic acid, Excipients q.s.

Administration: 1 tablet (1.3 g) per 10 kg of body weight, twice a day. Outside the meal setting if possible.

Presentations:

- C: 210100 60-tablet container
- C: 210101 300-tablet clinical container
- C: 210103 120-tablet clinical blister pack
- C: 210102 300-tablet clinical blister pack

ENZYMES

INTESTINAL MUCOSA

GlutaVet

GlutaVet is formulated with natural substances that favor the regeneration of the intestinal mucosa.

Indications: food allergy linked to intestinal permeability, acute or chronic diarrhea, adjuvant to anti-inflammatory drugs or other toxic substances.

Composition per tablet: L-Glutamic acid: 750 mg, Glucosamine: 75 mg, *Ulmus pumila* (elm dry extract): 75 mg, Vitamin D3: 100 UI, Excipients q.s.

Administration: 1 tablet (1.3 g) per 10 kg of body weight, twice a day.

Presentations:

- C: 210110 60-tablet container
- C: 210111 300-tablet clinical container
- C: 210112 300-tablet clinical blister pack

LIVER

LIVER PROTECTION

Hepa-T-Detox

Antioxidants and amino acids for animals with liver disease. All its components favor the production of glutathione, an antioxidant that is essential for all detoxifying processes and the regeneration of hepatic cells.

Indications: acute and chronic hepatic disorders, removal of hepatic toxins, degenerative and chronic diseases, hepatic lipidosis.

Composition per tablet: L-Cysteine: 150 mg, *Silybum marianum* (milk thistle, silymarin): 100 mg, Choline: 75 mg, L-Methionine: 25 mg, Lipoic acid: 10 mg, Excipients q.s.

Administration: 1 tablet (1g) per 10 kg of body weight, twice a day, until normal analytical results.

Presentations:

- C: 210010 60-tablet container
- C: 210011 300-tablet clinical container
- C: 210012 300-tablet clinical blister pack

KIDNEY

IMPROVED
FORMULA

KIDNEY PROTECTION

Urovet-C

Its ingredients maintain and regenerate the protective glycosaminoglycan layer of the bladder. It contributes to reduce the recurrent, chronic and antibiotic-resistant infections of the urinary tract. It has diuretic and antilithiatic properties.

Indications: urinary tract infections, idiopathic cystitis and bladder stones.

Urovet-RQ

It supports kidney function. Its ingredients promote diuresis and excretion of urea. Calcium carbonate acts as a phosphate binder, as recommended by IRIS.

Indications: chronic kidney disease in cats and dogs.

Composition per gram: Fish oil (omega 3 essential fatty acids): 120 mg, Glucosamine: 60 mg, European blueberry (*Vaccinium myrtillus*): 30 mg, *Ortosiphon stamineus*: 12.5 mg, *Agropyron repens* (couch-grass): 25 mg, *Lepidium sativum*: 25 mg, *Lespedeza capitata*: 12.5 mg, Sodium ascorbate (Vitamin C): 10 mg, Excipients q.s.

Administration: 2 g per 10 kg of body weight, twice a day.

(1 g = 4 cm paste)

Presentation: C: 210090 100 g tube

Composition per gram: Calcium carbonate: 150 mg, Fish oil (omega 3): 120 mg, L-Arginine: 80 mg, Glycine: 40 mg, Soy lecithin: 30 mg, *Ortosiphon stamineus*: 25 mg/g, *Lespedeza capitata*: 10 mg/g, *Urtica dioica*: 12.5 mg, Sodium bicarbonate, Excipients q.s.

Administration: 2 g per 10 kg of body weight, twice a day, together with food. (1 g = 4 cm paste)

Presentation: C: 210091 100 g tube

NEUROLOGY

NEW
PRESENTATION

NEUROLOGICAL PROTECTION

NeuroVet

It provides a supplement of antioxidants and specific nutrients for animals with neurological problems.

Indications: elder pets, recovery after neurological pathologies (vestibular disease, Spinal disc herniation...), adjuvant treatment for epilepsy, stress or behavior disorders, etc.

Composition per dose (tablet or paste): L-Phenylalanine: 75 mg, Vitamin B1 (Thiamine): 50 mg, L-carnitine L-tartrate: 50 mg, L-Tryptophan: 50 mg, Vitamin E: 50 UI, Micronized soya: 20 mg, Vitamin B6 (Pyridoxine): 20 mg, Vitamin B12 (cyanocobalamin): 300 mcg, Excipients q.s. Paste also contains fish oil, malt and brewer's yeast.

Administration: 1 tablet (1 g) per 10 kg of body weight, twice a day.

Paste: 4 cm (1.7 g) per 10 kg of body weight, twice a day.

Presentations:

- C: 210020 60-tablet container
- C: 210021 100 g tube

OCULAR PROTECTION IN DEGENERATIVE DISEASES

OcuHealth

It is based on alpha-lipoic acid, the universal antioxidant.

Indications: it offers nutritional support in cataracts and glaucoma. Adjuvant in degenerative processes in the retina caused by diabetes or insulin treatment.

Composition per tablet: Taurine: 250 mg, Sodium ascorbate (Vitamin C): 50 mg, *Citrus sinensis* (orange bioflavonoids), Lipoic acid: 15 mg, European blueberry (*Vaccinium myrtillus*): 10 mg, Zinc chelate of methionine: 10 mg (Zinc: 2 mg), *Vitis vinifera* (grape seed): 20 mg, *Tagetes erecta* (Lutein): 6 mg, L-Selenomethionine: 5 mg (Selenium: 0.1 mg), Excipients q.s.

Administration: 1 tablet (1 g) per 10 kg of body weight per day. Dosage can be increased according to the veterinarian's criteria.

Presentations:

C: 210040 60-tablet container

C: 210041 300-tablet clinical container

C: 210042 300-tablet clinical blister pack

HEART PROTECTION

Cardio I

Deficiencies in Carnitine, Taurine or Co-enzyme Q10 are common in multiple heart diseases. Cardio I provides antioxidants and specific nutrients to support the cardiac function.

Indications: early stages of heart diseases and/or elder pets.

Cardio II

It provides extra dosage of Carnitine.

Indications: advanced heart failure, dilated and hypertrophic cardiomyopathy and congestive heart failure (CHF).

Composition per tablet: Taurine: 200 mg, L-carnitine L-tartrate: 200 mg, Glycine: 50 mg, *Vitis vinifera* (grape seed): 50 mg, Co-enzyme Q10: 10 mg, Magnesium gluconate: 92.6 mg (Magnesium: 5 mg), Potassium gluconate: 30 mg (Potassium: 5 mg), Copper sulfate: 25 mg (Copper: 10 mg), L-Selenomethionine: 250 mcg (Selenium 5 mcg), Excipients q.s.

Administration: 1 tablet (1 g) per 10 kg of body weight per day.

Dosage can be increased according to the veterinarian's criteria.

Presentation: C: 210030 60-tablet container

Composition per tablet: L-carnitine: 500 mg.

Administration: 1 tablet (1 g) per 10 kg of body weight per day.

Dosage can be increased according to the veterinarian's criteria.

Presentation: C: 210031 60-tablet container

IMPROVED FORMULA

HEART PROTECTION

Cardio-R-Vet

Nutritional support in chronic heart failure. Ribose allows the synthesis of ATP, DNA and RNA to repair cellular damage caused by heart failure. Studies on Cardio-R-Vet show beneficial effects on the dog's quality of life: it increases recovery, mobility and body weight while reducing fatigue.

Indications: hypertrophic or decompensated dilated cardiopathy, CHF.

Composition per gram: D-Ribose: 705 mg, L-carnitine L-tartrate: 200 mg, Co-enzyme Q10: 8.3 mg, Excipients q.s.

Administration:

• Small animals: 1 measuring spoon of 1.25 ml / 3 kg of body weight, twice a day.

• Medium and large animals: 1 measuring spoon of 5 ml / 15 kg of body weight, twice a day.

Presentations:

C: 210032 250 g container

C: 210033 60 g container

NUTRITIONAL SUPPORT IN CANCER

OncoVet I

All cancer patients (99%) suffer from nutritional deficiencies which are difficult to compensate, as biochemical processes are highly compromised. OncoVet I provides nutritional support for all types of neoplasms, during chemo- and radiotherapy and pre- and post-surgery.

Composition per tablet: Glutamic acid: 150 mg, *Silybum marianum* (Milk thistle, silymarin): 100 mg, *Punica granatum* (Pomegranate): 125 mg, *Camellia sinensis* (Green tea): 100 mg, *Curcuma longa* (Turmeric): 50 mg, *Vitis vinifera* (Grape seed): 20 mg, L-Selenomethionine: 1 mg (Selenium: 0.02 mg), Excipients q.s.

Administration: 1 tablet (1 g) per 10 kg body weight, twice a day.

Presentations:

C: 210050 60-tablet container

C: 210051 300-tablet clinical container

C: 210052 300-tablet clinical blister pack

NEW

OncoVet II

It is formulated with amino acids, vitamins, antioxidants and minerals to compensate the nutritional deficiencies caused by oncological diseases and treatments. It promotes the activity of the immune system, reinforces the extracellular matrix and improves the quality of life of the patients.

▶ **Don't miss our explanatory video:** <http://bit.ly/2fA3iHv>

Composition (in 3 g): Whey protein: 2000 mg, L-Proline: 75 mg, L-Lysine: 50 mg, L-Arginine: 150 mg, Niacinamide (Vitamin B3): 200 mg, Sodium ascorbate (Vitamin C): 300 mg, Vitamin D3: 300 UI, Vitamin K3: 3 mcg, Lipoic acid: 10 mg, Magnesium gluconate: 100 mg (Magnesium: 5.4 mg), Zinc chelate of methionine: 30 mg (Zinc: 6 mg), Excipients q.s.

Administration: Small animals: 0.6 g / 2 kg body weight, twice a day. Medium and large animals: 3 g / 10 kg body weight, twice a day

Presentations:

C: 210056 120 g container (with 0.6 g measuring spoon)

C: 210055 240 g container (with 3 g measuring spoon)

GUM DISEASES

GingiVet

Nutritional support for animals with gum and buccal mucosal problems.

Indications: it has been formulated to address all the nutritional deficiencies linked to gum diseases. It is indicated for calicivirus infections and hard-to-heal wounds.

Composition per tablet: L-Lysine: 400 mg, Glycine: 200 mg, Co-enzyme Q10: 20 mg, *Vitis vinifera* (Grape seed): 20 mg, Lipoic acid: 10 mg, Zinc chelate of methionine: 50 mg (Zinc: 10 mg), Folic acid: 200 mcg, Vitamin B12: 100 mcg, L-Selenomethionine: 350 mcg (Selenium: 7 mcg), Excipients q.s.

Administration: 1 tablet (1 g) per 10 kg body weight per day.

Presentation:

C: 210002 60-tablet container

IMMUNOMODULATORY NUTRITIONAL SUPPORT

ImmuHealth

It provides nutrients that promote and optimize your pet's immune system.

Indications: immunosuppressed pets, during and after anti-infectious treatments, vaccines, stress and for viral diseases. Leishmania and parvovirus.

Composition per tablet: Glycine: 100 mg, Arabinogalactan: 100 mg, Glutamic acid: 70 mg, Sodium ascorbate (Vitamin C): 50 mg, *Echinacea purpurea*: 50 mg, *Camellia sinensis* (Green tea): 50 mg, Vitamin B6 (Pyridoxine): 10 mg, Zinc chelate of methionine: 25 mg (Zinc: 5 mg), Manganese chelate of amino acids: 1.5 mg (Manganese: 150 mcg), Folic acid: 200 mcg, Vitamin B12 (cyanocobalamin): 100 mcg, Excipients q.s.

Administration: 1 tablet (1 g) per 10 kg body weight, twice a day, during at least 10 days.

Presentation: C: 210070 60-tablet container

MINERAL COMPLEX

Minsal

Mineral complex that catalyzes a broad range of biochemical reactions that are necessary to maintain optimal health.

Indications: Immune disorders, bacterial, viral and parasitic diseases, oncologic patients with or without chemo- or radiotherapy, allergies, neurological disorders, convulsions, vaccine side effects, adjuvant of other therapies.

Observed effects: increase of appetite, body weight and vitality, disappearance of the dermal leishmaniasis symptoms, improvement of hematologic parameters (white and red blood cells, platelets).

Composition: silicates, silicoaluminate and calcium oxides, potassium, sodium, magnesium, manganese with high content of metals such as iron, zinc, sulfur, selenium, copper, cobalt, chromium, phosphorus, nickel and lithium.

Administration: Cats and puppies < 5 kg: ½ measuring spoon per day. Dogs: 1 measuring spoon per 10 kg body weight per day. Initial period of treatment: 30 days.

Presentations:

C: 230010 30 g container

C: 230012 60 g container

NEW
natural line

NATURAL ANTHELMINTIC

VermiStop

Dietary supplement indicated during the treatment and prevention of intestinal parasites of dogs and cats. VermiStop is formulated with dry extracts of 6 plants that contribute to create a hostile environment for parasites, as well as to stimulate the natural, physiological processes against them.

Composition per tablet: Garlic extract (*Allium sativum*): 300 mg, Pumpkin seed extract (*Cucurbita pepo*): 300 mg, Grape seed extract (*Vitis vinifera*): 50 mg, Barberry root extract (*Berberis vulgaris*): 50 mg, Marshmallow extract (*Althaea officinalis*): 50 mg, Echinacea extract (*Echinacea purpurea*): 50 mg, Excipients q.s.

Administration: 1 tablet (1.3 g) per 10 kg of body weight per day.

Presentation: C: 260001 120-tablet clinical blister pack

ETHOLOGIC COPROPHAGY

CoproVet

Coprophagy can be a symptom of a certain pathology (malabsorption, pancreatitis...) or a behavior disorder. The latter can be discouraged by administering CoproVet, a natural product based on plant extracts that gives an unpleasant taste and odor to cats and dogs' feces.

Composition: Yucca, mint and pineapple extracts, excipients q.s.

Administration: 1 measuring spoon/5 kg of body weight per day. If it's autocoprophagy, administer CoproVet to that animal. If the pet eats other animals' feces, CoproVet should be administered to those.

Presentation: C: 260010 50 g container with measuring spoon.

NEW

MICROBIOTA AND DIGESTIVE FUNCTION

Floravet Complex

Unique mixture of pre- and probiotics, plant and medicinal mushrooms extracts to optimize the gut flora and the digestive function.

Indications: Acute and chronic diarrhea, colic, flatulence, atopic dermatitis and food allergies, stress periods, poor stool quality, together with antibiotics, anti-inflammatory treatments, chemotherapy, etc.

Composition per sachet (2g): *Enterococcus faecium*: 1x10⁹ UFC, Chicory extract: 300 mg, Brewer's yeast: 200 mg, Fennel extract: 150 mg, Anise extract: 150 mg, Licorice extract: 150 mg, Lion's mane extract: 100 mg, Shiitake extract: 100 mg, Excipients q.s.

Administration: 1 sachet (2 g) per day, independently of the pet's weight.

Presentation: C: 260020 Box with 25 sachets of 2 g.

FOOD SUPPLEMENTS

CHONDROPROTECTOR

Artivet Complex

Chondroprotector for cats and dogs with a reinforced formula. In addition to chondroitin and glucosamine, it includes MSM, Hyaluronic acid, Glycine and Hydrolyzed Type II Collagen as effective nutrients against joint degeneration. Hyaluronic acid acts as a shock absorber in the connective tissue. MSM diminishes inflammation by means of reducing the pressure inside the cell.

Indications: as a preventive in elder pets, large breed dogs or dogs practicing intense exercise. With repairing and anti-inflammatory effect in osteoarthritis, rheumatism, joint surgeries and trauma.

Composition per tablet: Chondroitin sulfate: 300 mg, Glucosamine hydrochloride: 300 mg, MSM: 250 mg, Glycine: 150 mg, Type II hydrolyzed collagen: 150 mg, Hyaluronic acid: 15 mg, Zinc chelate of methionine: 50 mg (Zn: 10 mg), Sodium ascorbate (Vit. C): 10 mg, Excip. q.s.

Administration: 1 tablet (1.3 g) per 10 kg body weight per day, up to 4 tablets/day.

Presentations:

C: 160204 60-tablet container

C: 160205 300-tablet clinical container

C: 160206 1 kg in powder, for horses

C: 160207 300-tablet clinical blister pack

NEW
PRESENTATION
IN BLISTER

Artivet Complex Large Breeds

Same ingredients as Artivet Complex, in 2.5 g tablets for large breed dogs.

Composition per tablet: Chondroitin sulfate: 577 mg, Glucosamine hydrochloride: 577 mg, MSM: 480 mg, Glycine: 288 mg, Type II hydrolyzed collagen: 288 mg, Hyaluronic acid: 29 mg, Zinc chelate of methionine: 95 mg (Zinc: 19 mg), Sodium ascorbate (Vit. C): 19 mg, Excip. q.s.

Administration: <30 kg: 1 tablet (2.5 g)/day; >30 kg: 2 tablets (2.5 g)/day.

Presentations:

C: 160240 60-tablet container

C: 160241 120-tablet container

C: 160242 240-tablet clinical blister pack

CHONDROPROTECTOR

CondroCit

Specially formulated for dogs' and cats' joints. It combines shark cartilage with glucosamine, chondroitin sulfate (natural glycosaminoglycans) and MSM (bioavailable sulfur).

Indications: repairing effect on cartilages and joints. Anti-inflammatory and muscular relaxing effect. Very effective against arthritis and rheumatism. Preventive in puppies of large breed dogs.

Composition per tablet: Methylsulfonylmethane: 400 mg, Glucosamine hydrochloride: 300 mg, Shark cartilage: 150 mg, Chondroitin sulfate: 150 mg, Manganese sulfate: 10 mg, Excipients q.s.

Administration: 1 tablet (1.3 g) per 10 kg body weight per day.

Presentations:

C: 160216 60-tablet container

C: 160218 120-tablet container

MULTIVITAMIN

VitaVet Complex

It is a dietary supplement that helps animals to recover from anemia and vitamin deficiencies. It corrects diet deficiencies and provides a boost of vitamins and minerals in conditions such as pregnancy, convalescence, lactation, and old age. It contains trace elements, which are catalysts of biochemical reactions.

Composition per tablet: Ferrous fumarate: 29 mg (Iron: 9.5 mg), Copper sulfate: 16 mg (Copper: 0.5 mg), Zinc chelate of methionine: 65 mg (Zinc: 13 mg), Vit. A: 1250 UI, Vit. B1 (Thiamine): 1 mg, Vit. B2 (Riboflavin): 1 mg, Niacinamide: 10 mg, Calcium-D-pantothenate: 0.5 mg, Vit. B6 (Pyridoxine): 1 mg, Folic acid: 0.2 mg, Vit B12 (Cyanocobalamin): 8 mcg, Vit. E: 2 UI, Vit. D3: 125 UI, Excipients q.s.

Administration: 1 tablet (1 g) per 10 kg body weight per day.

Presentation:

C: 160231 60-tablet container

OMEGA-3 KRILL OIL

KrillVet

Krill oil is 100% natural and it is rich in the phospholipid form of EPA and DHA, allowing a better absorption and therefore a stronger and quicker response compared to fish oil. It also contains high levels of Astaxanthin, with high antioxidant effect. Certified sustainable seafood.

Indications: skin and fur health, joint inflammation, cognitive function, ocular and renal systems, reduction of the cardiovascular risk.

Composition per capsule: 500 mg krill oil.

Fatty acid content per capsule: Total Omega-3 fatty acids: 124 mg, EPA: 69 mg, DHA: 32.5 mg, Astaxanthin: 83 mcg, Choline: 30 mg, Phosphatidylcholine: 230 mg.

Administration: Cats and dogs < 10 kg: one capsule every two days.

Dogs > 10 kg: one capsule per 10 kg body weight per day.

Dosage can be increased according to the veterinarian's criteria.

Presentations:

C: 160235 60-capsule container

C: 160236 120-capsule container

ESSENTIAL FATTY ACIDS + BIOTIN + Zn + Se

Dermovital Omega 3-6-9

Optimized formula with a balanced amount of essential fatty acids omega 3, 6 and 9, together with MSM, Biotin, Zn and Se. It exerts anti-inflammatory and wound-healing effect, promoting the skin metabolism. It supports the growth and protection of fur, skin and nails.

Indications: dull and dry fur. Infections and allergies, dermic disorders such as eczema and atopic dermatitis.

Composition per capsule: Enriched fish oil: 260 mg, Borage oil: 140 mg, Olive oil: 60 mg, MSM: 15 mg, Zinc oxide: 3.49 mg (Zinc: 2.8 mg), L-Selenio-methionine: 10.53 mg (Selenium: 50 mcg), Vitamin E: 0.5 mg, Excipients q.s.

Fatty acid content per capsule: EPA (ω3): 85.8 mg, DHA (ω3): 57.2 mg, GLA (ω6): 32.2 mg, LA (ω6): 51.8 mg, Oleic acid: 45.1 mg, Arachidonic acid: 2.1 mg, Erucic acid: 3.5 mg.

Administration: Cats and puppies: 1 capsule (710 mg)/day.

Dogs < 15 kg: 2 capsules/day. Dogs > 15 kg: 3 capsules/day.

Presentations:

- C: 160211 60-capsule container
- C: 160219 300-capsule clinical container
- C: 160220 300-capsule clinical blister pack

OMEGA-3 AND OMEGA-6 ESSENTIAL FATTY ACIDS

Dermovital Drops

This combination of omega-3 and omega-6 fatty acids is aimed at reducing inflammatory processes linked to dermal hypersensitivity as well as skin and hair repair. The drop dosage system allows its administration to small dogs, cats and other pets, including birds, rodents and ferrets.

Composition per gram: Evening primrose oil: 850 mg, Fish oil: 150 mg.

Fatty acids content per ml: Gamma-linoleic acid (GLA) ω6: 70.76 mg, Linoleic acid (LA) ω6: 581 mg, Eicosapentaenoic acid (EPA) ω3: 24.98 mg, Docosahexaenoic acid (DHA) ω3: 16.65 mg.

Administration: Kitties: 5 drops/day. Adult cats: 10 drops/day.

Dogs: 5 drops/day/kg body weight. Birds: 1 drop/day.

Rodents: 1 to 5 drops/day

Presentation:

- C: 160208 15 ml dropper bottle

DERMAL COMPLEX WITH ZINC

Dermovital Zinc

Zinc is an essential trace element for animals. It is involved in the formation of fur, skin and claws. Together with the effects of omega-3 and omega-6 fatty acids, Biotin, Vitamin A, and Vitamin B complex, this product is a broad-spectrum food supplement for dogs with skin disorders such as eczema, descaling, hair loss or dull fur.

Composition per tablet: Zinc chelate of methionine: 125 mg (Zinc: 25 mg), Salmon oil: 40 mg, Borage oil: 120 mg, Olive oil: 8 mg, Biotin: 1 mg, Vit. A: 250 UI, Vit. B1: 1.5 mg, Vit. B3: 10 mg, Calcium-D-pantothenate: 5 mg, Vit. B6: 2 mg, Folic acid: 0.2 mg, Vit. B12: 2 mcg, L-Selenomethionine: 10.53 mg (Selenium: 50 mcg), Excipients q.s.

Administration: 1 tablet (1 g) per 10 kg body weight per day.

Presentation: C: 160234 60-tablet container

BIOTIN + B-GROUP VITAMINS

Biotin B Complex

It includes a high concentration of biotin and a balanced proportion of B-group vitamins. Biotin participates in carbohydrate and lipid metabolism, thus contributing to skin, fur and nails health maintenance. B-group vitamins favor the recovery of skin health during severe cutaneous disorders. It provides protection and supports growth of fur, skin and mucous membranes.

Indications: dogs with severe skin disorders such as hair loss, irritation, pruritus, dermatoses, dull and rough coat.

Reduces shedding periods. Provides support in controlling Candidiasis. Neurological disorders.

Composition per tablet: Biotin: 14 000 mcg, Vitamin B1: 1.4 mg, Vitamin B2: 1.6 mg, Vitamin B6: 2.0 mg, Vitamin B12: 1.0 mcg, Excipients q.s.

Administration: 1 tablet (1 g) per 10 kg body weight per day.

Presentations:

- C: 160222 100-tablet container
- C: 160224 300-tablet clinical container
- C: 160230 1 kg container for horses

SPIRULINA ALGAE

Espiruvet

Spirulina is a microalga which contains a large amount of essential nutrients, such as vegetable proteins, B-group vitamins, minerals, carotenoids, organic iron and antioxidants. It is a natural source of β-carotene and phytonutrients, including chlorophyll, phycocyanines and polysaccharides.

Indications: to enhance fur, eyes and nose color. It helps pigmentation and strengthens the immune system.

Improves digestion and intestinal function and produces a moderate satiating effect.

Composition per tablet: Spirulina: 300 mg, Brewer's yeast extract: 88 mg, Excipients q.s.

Analytical composition: crude protein 65.5%, β-carotene: 2300 IU/tablet, Iron: 1.5 mg/tablet, vitamin B12: 3.2 mcg/tablet.

Administration: 3 tablets (3 x 1 g) per 10 kg body weight per day.

Presentations:

- C: 160223 250-tablet container
- C: 160225 750-tablet clinical container

NEW PRESENTATION IN BLISTER

BIOAVAILABLE SULFUR

MSM

MSM is a rich source of bioavailable sulfur, an essential mineral in all animals' diets. It is a natural detoxifier: it increases cellular flexibility and permeability, favoring nutrients influx and toxin efflux.

Indications: skin: Adjuvant to allergy and dermatitis treatments (suppresses residual irritation in dogs with allergy treatments), strengthens nails and footpad, prevents alopecia, promotes healthy and shiny fur, improves post-distemper dermal condition.

It is a Histamine neutralizer agent, so it can be an alternative or be alternated with corticosteroids. Muscle pain, long-term arthritis treatment, rheumatism, bursitis, acute gastritis, respiratory allergies.

Composition per tablet: Methylsulfonylmethane: 500 mg, Excipients q.s. In powder, contains 500 g MSM/kg.

Administration: 1 tablet (1 g) per 10 kg body weight per day.

Presentations:

- C: 160214 60-tablet container
- C: 160215 300-capsule clinical blister pack
- C: 160217 1 kg in powder, for horses

ORGANIC CALCIUM/PHOSPHORUS + VIT A, D, E

Calcio Fósforo

It is an essential source of vitamins and minerals, formulated with organic calcium/phosphorus, as well as vitamins A, D3 and E. Ideal calcium source for BARF diets.

Indications: During your dog's first months of life, especially during teething and the main growth stage (until it is 7 or 8 months old). Also indicated for expectant and lactating mothers.

Composition: Calcium gluconate, Dicalcium phosphate, Soya, Lactose, Vitamin A, Vitamin D3, Vitamin E, Excipients q.s.

Administration: 1 tablet (1 g) per 10 kg of weight per day.

Presentations:

- C: 160201 100-tablet container

HYGIENE AND BEAUTY CARE

DENTAL SPRAY

DentiVet Total Protection

It offers a complete oral hygiene: protects gums and sensitive, delicate teeth. It controls plaque and tartar build up and eliminates bad breath. Due to its astringent, desensitizing and healing effects, it is especially indicated as an adjuvant in periodontal disease, as well as an excellent support before and after dental treatments.

Composition: Chlorhexidine digluconate, Sodium fluoride, Zinc gluconate, Lysine, Glycine, D-panthenol, Potassium nitrate, Polysorbate 20, Aroma, Colorant, Water.

Instructions for use: Spray on the animal's teeth twice a day, without brushing or rinsing. When running the tongue over its teeth, the animal favors the spread of the product.

Presentation: C: 150107 125 ml spray bottle

DENTAL SPRAY

DentiCan Spray

Oral spray with the most innovative and comfortable formula for your pets' oral and dental hygiene. Its triple action formula eliminates bad breath and controls plaque and tartar in cats and dogs. It can be used from a young age onwards.

Composition: Chlorhexidine digluconate, Sodium saccharine, Sodium fluoride, Benzoic acid, Sodium benzoate, Aroma, Excipients q.s.

Instructions for use: Spray on the animal's teeth once a day, without brushing or rinsing. When running the tongue over its teeth, the animal favors the spread of the product.

Presentation: C: 150100 125 ml spray bottle

SOLUBLE MOUTHWASH

DentiCan Soluble

The product dissolves comfortably in their drinking water. Its components help to prevent the formation of plaque and tartar and eliminate bad breath. It can be used from six months of age onwards.

Composition: Chlorhexidine digluconate, Sodium fluoride, Benzoic acid, Polysorbate 20, Vanilla aroma, Glycerin, Colorant, Potassium sorbate, Zinc gluconate, Water. It does not contain Xylitol.

Instructions for use: Dilute 1 cap of DentiCan Soluble per liter of drinking water. Change the water every day.

Presentations:

C: 150110 250 ml bottle

C: 150108 500 ml bottle

TOOTHBRUSH AND TOOTHPASTE

Dental Kit

Dentican toothpaste has been specially designed for pets. It eliminates bad breath and combats tartar and plaque. It is formulated with papain, a proteolytic enzyme that provides a whitening effect and strengthens the antiplaque effect after brushing. The toothbrush has a flexible triple head which makes it comfortable and effective. It is specially designed for dogs' teeth and facilitates a safe cleaning even in hard-to-reach places.

Toothpaste composition: Glycerin, Hydrated silica, Tetrapotassium pyrophosphate, Sorbitol, Papain, Tetrasodium pyrophosphate, Xanthan gum, Titanium dioxide, Triclosan, Sodium saccharine, Vanilla aroma, Sodium methylparaben, Disodium EDTA, Kaolin, Water.

C: 150127 500 ml spray bottle

NEW FORMULA

TANNING SPRAY

CurtiVet

Tanning lotion for pads. The new formulation includes Urea and MSM, two keratolytic agents that are essential for the maintenance of the skin balance. Together with the 3 plant extracts (Centella, Aloe Vera and Thymus), CurtiVet prevents irritation, increases abrasion resistance and promotes wound healing. It does not stain clothes, it is easy to use and it dries quickly.

Composition: Glycerin: 40%, Urea: 5%, MSM: 3%, *Centella asiatica* extract: 3%, *Aloe barbadensis* extract: 0.3%, *Thymus vulgaris* extract: 0.3%, Excipients q.s.

Instructions for use: Spray directly onto the paw area. Preventive maintenance: daily, starting from three weeks before the high activity season. During the season: use once every three days. In irritated paws: use daily for two weeks.

Presentation:

C: 150124 125 ml spray bottle

TEAR STAIN REMOVER

CanBel

CanBel removes tear stains and improves the appearance of your dog's or cat's eyes. For a complete ocular health, it is recommended to combine it with OptiCan. It effectively eliminates all kinds of body stains on white dogs: legs, genitals and perianal region.

Composition: Boric acid, Hamamelis water, anhydrous disodium phosphate, monosodium phosphate dihydrate, disodium edetate, Excipients q.s.

Presentations:

C: 150119 60 ml bottle with a cannula

C: 150121 500 ml spray bottle

EYE HYGIENE OptiCan

Balanced solution for lubrication and care of your pet's eyes. Artificial tears with soothing effect. It is an aid to protect against infections and external agents. It helps to reduce chemosis and soothes, refreshes and sedates sore eyes.

Composition: Hamamelis water, anhydrous disodium phosphate, monosodium phosphate dihydrate, sodium chloride, disodium edetate.
Instructions for use: Press the bottle and apply several OptiCan drops in the eyes. Dry the eye contour with sterile gauze. Repeat frequently to relieve pain and maintain ocular health.

Presentation:
C: 150114 125 ml bottle with a cannula

OUTER EAR HYGIENE OtiCan

It is an excellent ear cleaner with an emollient action to dissolve earwax and to soften scabs in dogs' and cats' outer ear.

Composition: Water, ethanol, glycerine and isopropyl alcohol
Instructions for use: Apply several OtiCan drops in the ear canal. Massage by pressing the base of the ear with the fingers for some minutes. Tilt the animal's head to easily remove the earwax.

Presentation:
C: 150101 125 ml bottle with a cannula

EAR HYGIENE OtiVet

Ear cleaning and softening solution with essential oils. It can be used as a pre-cleaning or as a vehicle solution for treatments in cases of external otitis. It contains thyme extract to prevent infections.

Composition: Water, glycerine, propylene glycol, calendula and thyme essential oils.

Instructions for use: Apply several OtiVet drops in the ear canal. Massage by pressing the base of the ear with the fingers for some minutes. Dry with sterile gauze.

Presentation: C: 150123 125 ml bottle with a cannula

HYGIENIC WIPES Lys

Disposable wet wipes to clean eyes and ear canals of cats and dogs. The wipes are impregnated with a soothing solution specially designed for sensitive areas.

Composition: Water, Propylene glycol, *Aloe barbadensis* extract, *Hamamelis virginiana* extract, excipients q.s.

Presentations:
